Solution

This article applies to the [WSO Pro Advance License](#) ONLY.

With the latest updates to WarriorPlus and WSO Pro, Vendors are now able to sell products in more flexible ways, including the ability to list "self-hosted" products that are NOT listed on the Warrior Forum.

And now, you can also use WarriorPlus to host your offer salespage as well.

An 'Offer' is simply a way to group your 'Products' and make them available for sale to others. For the most part with this system, you will NOT sell a 'Product' directly -- you will create 'Offers' and add your Products to them (Using the WSO Pro Advance License).

Vendors can also set up powerful sales funnels with unlimited products, upsells and downsells.

This system has been designed to be as easy to use as possible, but here is a quick rundown on how it works:

1. Create your Products first

No matter if you are selling a single product, or multiple products as part of a sales funnel, the first thing to do is create all of your products.

This is done by going to the [My Products page](#) in the Vendor area, and clicking the green '+ New Product' button near the top right.

To become a Vendor on WarriorPlus is FREE.

After Submitting your Offer Request, You will get a Approval Notice via email from W+, Then edit your time and set offer as **PUBLIC.**

That's all.

You will get Tons of Visitors from W+ Marketplace and getting Sales which will directly added on your PayPal account and you can use those \$\$\$\$ instant as your need.

Do it Whenever you want and enjoy Real Instant Commission !
