Hi friend,

There are quite literally hundreds of sites similar to this one, and deciding which one to use can be quite a challenge.

So to help you decide if it's going to be worth it for you, we want to find out exactly how this platform is being received by its users, and how the site works.

We also want to try and get a good idea of how much you are likely to earn should you decide to join, and what the pros and cons are likely to be.

However, first lets first take a look at how things work at Idle Empire.

Idle-empire is an earning platform with lots of features and earning ways. It will let you earn points that can be exchanged for cryptocurrency and many other gift cards. Below are the many features and perks of this site!

What Is Idle Empire?

Idle empire is a website that offers its members the opportunity to earn points that you can convert and redeem for rewards.

The tasks that they offer are similar to other GPT (Get Paid To) websites currently online including surveys, Offerwalls, Offers, Videos, Promotions and referrals.

They do however also offer the opportunity to earn through Bitcoin mining which involves using your computer to solve mathematical problems, so this is a slightly different task that is normally offered by GPT sites.

What Are Users Saying About Idle Empire?

It is always important to look at the feedback that real users are giving about a reward site, because first and foremost you want to make sure the site has been paying people for the work they do.

At the time of writing the site scores really well on TrustPilot with an almost 5/5 score from reviews left by 8,500 reviewers. Amongst those reviews there are people saying they have withdrawn rewards from the site, so that is a good sign of legitimacy.

There wasn't too many complaints about the site either. We try to look for repeated patterns of complaints such as of course 'I haven't been paid' which we didn't find.

The platform has an Instagram account where it advertises its promotions. Currently the site has 16.5k

followers, so this is another encouraging sign. It isn't likely that so many users would follow if they weren't getting paid.

How Much Can You Earn With Idle Empire?

There are plenty earning opportunities available at Idle Empire, which is what you would hope to expect from any GPT site anyway. The tasks are, like all similar GPT sites, low paid, however some of the tasks pay more than others.

If you want to maximise your earnings then you will earn the most participating in offers. They generally pay more than surveys, however you also need to be careful and read the terms and conditions of the offer fully so you understand what you are being signed up to.

Surveys also generally pay more than other tasks, however you will have to qualify first. You will only qualify if your demographic fits the survey requirements. You may therefore not qualify for a few surveys before you find one that is a good match.

The amount of points you get for surveys seems to be a lot more than what it is. For example if you get 4,000

points for a survey, this amounts to just \$0.40 as 1000 points is equivalent to \$0.10.

Some users have pointed out the fact that the surveys aren't as high paying as on some other platforms.

Idle Empire also has a referral program, and it isn't a bad one. For each referral you will be rewarded 50 points. You also get 20% of what your referrals earn when they complete offers and surveys.

To encourage your followers to sign up they get 500 points by using your referral link.

Other earning opportunities on the site like watching videos and Bitcoin mining will pay you less than offers and surveys.

From the U.S, Canada or Australia? There is a survey platform has been created just for you. [FIND OUT MORE HERE](#)

How Do You Get Paid At Idle Empire?

There is an impressive selection of methods of payment that include various gift cards, bitcoin and also PayPal. The redemption amounts vary but they are all quite low, the highest being just a few dollars. With active

participation on the site you should be able to cash out soon on this site.

What Are The Pros Of Idle Empire?

- Free to join platform
- Lots of ways to earn
- A number of ways to cash out.
- Low cash out for gift cards, bitcoin and PayPal.

1) Ways to earn

Below is the list of ways which will let you earn points

- Surveys
- Offerwalls
- Special offers
- Watching videos
- Mining

- Promotions
- Referral program
- Leaderboard prizes
- Giveaways

2) Boost for your earnings

Idle-empire will add some percentage (may vary) boost to the surveys and offers to increase your earnings even more to reach your targeted earnings.

3) Withdrawals

Man, I love this part, who doesn't? Idle-empire has lots of withdrawal options for every country. You can withdraw your points for cryptocurrency to [Coinbase](#) with no withdrawal fee (The best part is that it is instant). And you know what unlike many sites like this idle-empire has a

minimum withdrawal of \$0.10(1,000 coins) means you can withdraw any amount and don't have to wait to reach a higher threshold.

4) Conclusion

Idle empire is legit and it does not have a ridiculously high withdrawal coin threshold, you earn like 6000 per survey, and each prize costs on average 1000–50 000 points. My only complaint is the holding time and how you sometimes

need to wait for more surveys, but apart from that, their legit as can be... So far, I have earned about 6 dollars on this site, and withdrawn it to [Coinbase](#) in different cryptos, like Bitcoin, Ethereum, and Litecoin.

My #1 Recommendation:

Need to make some profits on the side? ...ASAP!?

Discover my quick method to banking \$25-\$75/day "on the side" - by doing just a few easy steps!

No paid traffic required. No affiliate recruiting needed.

None of that!

And results come within just 24 to 48 hours!
